Are you not confident in identifying cognitive decline associated with AD?

The Davos Alzheimer's Collaborative Healthcare System Preparedness (DAC-SP) Early Detection Blueprint¹

Expanding the use of Brief Cognitive Assessments to Detect Suspected Early-Stage Cognitive Impairment in Primary Care²

DCA Decision Matrix Criteria by User Type³

Guidance to Assess Various Aspects of Cognitive Assessment Tools for Site Consideration⁴

Do you have a network or multidisciplinary team but are not effectively communicating to provide the necessary continuity of care for AD patients throughout their diagnosis and treatment journey?

Motivating Others: Soft Skills Needed to Lead and Support Implementation Initiatives⁵

DAC Healthcare System Preparedness Learning Laboratory: Catalyzing Healthcare System Transformation for Timely and Accurate Diagnosis of AD⁶

Do you lack an established network or multidisciplinary team to help care for patients along their diagnosis and treatment journey?

DAC Healthcare System Preparedness Learning Laboratory: Driving Early Detection Across Aging Societies⁷

Brain Health Navigator Workflow from the DAC System Preparedness Early Detection Indiana University Flagship Site⁸

Brain Health Navigator Job Description From Indiana University⁹

Milken Institute Report on Building Dementia Workforce and System Capacity Through Care Navigation¹⁰

Are you geographically restricted, and looking for virtual AD education?

Advisory Group on Risk Evidence Education for Dementia (AGREEDementia)¹¹

Cognition in Primary Care Training¹²
